

Fire Safety

Fire safety is important. Your life is worth it...and so is theirs!

According to OSHA, workplace fires and explosions kill 200 and injure more than 5,000 workers each year. In 1995, more than 75,000 workplace fires cost businesses more than \$2.3 billion. “Fires wreak havoc among workers and their families and destroy thousands of businesses each year, putting people out of work and severely impacting their livelihoods”, said Secretary of Labor, Robert B. Reich (1996, October 8). “The human and financial toll underscores the serious nature of workplace fires.”

Why build and throw away?

Remember the last time you were on a jobsite and had to make a bulky and heavy wooden fire extinguisher stand? Then at the end of the job you had to throw it away because it was not easily transportable or no longer sturdy? We have a cost effective solution and are pleased to introduce our latest Patented Fire Safety Product. Our lightweight Fire Extinguisher Holder will not only position your extinguishers in highly visible and stable locations, but their beauty and design will complement the craftsmanship of your project.

Buy our product, protect and **save!**

OSHA mandates that the contractor shall be responsible for the development and maintenance of an effective fire protection and prevention program at the jobsite throughout all phases of construction, repair, alteration or demolition work. The employer shall ensure the availability of the fire protection and suppression equipment required by OSHA.. Here is where our product can help.

SPECIFICATIONS

- Measures 34” in Height
- Measures 21”x21” at the base
- Durable HDPE Plastic
- Designed to Nest and Stack for Efficient Mobility

FIRE-MATE

The fire extinguisher holder, known as the Fire-Mate, is manufactured of rotationally molded plastic parts. This tool was designed for the construction industry. The Fire-Mate assists in the protection of valuable employees and easily identifies the location of the extinguisher in the event of a fire.

Fire-Mate holds fire extinguishers ranging from 5lb, 10lb, and 20 lb.
